

Ask Us How to:

- Control capital expenses
- Improve worker mobility
- Increase speed-to-market
- Support business continuity

Industry-Leading Security Standards

Our cloud data center completed a rigorous Type II SOC 2 audit demonstrating we comply with security and availability criteria and host customers in a secure, controlled facility.

VIRTUAL SERVERS

Don't saddle your business with upfront capital equipment costs. Cbeyond's virtual servers give you the latest technology using our balance sheet, not yours. Easily scale your computing resources as you grow instead of paying for technology before you need it.

WE ARE MICROSOFT HOSTING EXPERTS

Cbeyond is the only company to win back-to-back Microsoft Hosting Partner of the Year awards for our innovation in cloud computing. Our cloud platform is built using the Windows technology you already know, eliminating the learning curve for your IT staff.

WE CAN MOVE YOU TO THE CLOUD

Our remote migration service can speed up your transition to the cloud. A certified engineer will migrate your application and data so you can quickly take advantage of your dedicated server.

WE MANAGE EVERY SERVER

Every virtual server from Cbeyond includes the following at no extra fee:

- 100% network uptime SLA
- 24x7x365 phone and email support
- Network and server monitoring
- Operating system installation, testing, patches and updates
- Break-fix hardware services and replacement guarantee
- Microsoft IIS patches and updates
- Network-wide enterprise firewall and intrusion protection management
- Anti-virus protection
- Government-grade data destruction

STANDARD PLANS

Plan	Processor	RAM	Storage	Bandwidth/Mo	Monthly Fee
